

Soulspaces -15 granite road fourways

Janet Young has 18 years experience in her field, and successfully worked with architects, designers, IT, Lawyers, Banks and investment companies to clear and energise their office space.

Janet's focus is in identifying subtle environmental energy flows. She releases untapped potential by reconfiguring energies, enabling them to move in a way that brings people into harmony with themselves and their surroundings. By pinpointing and identifying environmental factors and behaviours evident in relationships, language, workspace and living arrangements, she helps create harmony in you and your company, and when people are in harmony, great strides can be made easily.
